

Use case

Protection from explicit and irrelevant content for children's homes

SAFEDNS

Carl-Darren Marx, Director of QLine IT (PC Repair Leads LTD), speaks about their experience working with SafeDNS.

Organization overview

QLine IT is a MSP who offers all key IT support services including PC maintenance, format, PC builds, virus removal, tutorials and much more.

Location

Leeds, UK

Duration

2021 - present

Challenge

Protect the users of the Internet in 45 children's homes from materials harmful to minors.

Solution

SafeDNS cloud web filtering.

Impact

With SafeDNS all the children and other users of the Wi-Fi networks at children's homes are safe and have no longer access to all the harmful and inappropriate content.

Problem

QLine IT looks after 45 children's homes in the UK where they needed to ensure that all the children's homes and all the computers within them, including tablets, phones and anybody who connects via Wi-Fi was protected against resources inappropriate for children. SafeDNS works perfectly here as the web filtering solution complies with the rules and regulations of IWF, the Children's Internet Protection Act (CIPA), BpjM and the Canadian Centre for Child Protection.

Solution

Carl-Darren Marx, director of QLine IT, values the simplicity of SafeDNS solution as it takes only a few minutes to set up: "Once we had completed the onboarding, the solution was very straightforward. Essentially, create a profile on the portal, apply DNS IP details to individual routers, and it was literally as easy as that. So very straightforward as it is still to this day."

SafeDNS also has a feature that allows to set individual filtering rules for each end-user. It is convenient for QLine IT as they can make different profiles for different young people and grant or deny access to any resource individually.

Besides the child sector, using SafeDNS also gives QLine IT the opportunity to resell the solution to other clients who wish to have content filtering throughout their office environment. Carl-Darren Marx again highlighted the accessibility here, as it doesn't require any additional hardware or software and setups within minutes.

Result

All the Internet users in the children's homes, which are managed by QLine IT, now have a safe online environment protected from explicit and irrelevant content on the internet.

QLine IT is happy with SafeDNS cloud filtering solution, although Carl-Darren Marx mentioned the lack of some parental control features, but SafeDNS has an Android agent and an IOS agent is coming out soon!

SAFEDNS

The SafeDNS filtering technology received a prestigious award from the world-famous test lab, Software Suggest. SafeDNS solutions are recognized as having a good value for money.

SafeDNS blocks a whopping 98.5% of requests to adult content.
